Here is a list of known issues: Reset Window's Internet Connection Settings Using Wi-Fi Connection Manager on Windows. This article describes how to reset Windows Internet Connection settings using Wi-Fi Connection Manager. Reset Windows Internet Connection Settings Using Wi-Fi Connection Manager on Windows 7, 8.1, 10, Windows Server 2008, 2016 and Mac. This is very useful if you want to reset Windows Internet connection settings to default as per a new user. About me I'm a passionate software developer. I worked on my own cross-platform app for over 3 years. Today, I'm working on my second app. I'm here to learn new things from you. I'm now also teaching others. Q: KnockoutJS custom binding like observer I'm trying to figure out if KnockoutJS has a nice way of creating custom binding. I'm looking for something like this: Where myCustomObserver is a simple function that is called every time when the observable changes (but not all at once, only whenever there is a change). I want something that can be used with any observable (observableArray, observableNumbers, observableString, observableNumber, etc.) Thanks. A: You're looking for the observer/subscription syntax, which doesn't need a custom binding. You just need to use the subscribe function. Something like this: observableArray = ko.observableArray([1, 2, 3]); observableNumbers = ko.observableArray([]); observableNumbers.subscribe(function() { console.log("change"); }); observableArray.subscribe(function() { Hepatic veno-occlusive disease: current therapy. Hepatic veno-occlusive disease (VOD) is a potentially fatal syndrome that occurs after hematopoietic stem cell transplantation (HSCT). Most often, it develops in patients undergoing transplantation for hematological malignancies, with most cases occurring after allogeneic HSCT. VOD is also associated with some forms of chemotherapy-induced myelosuppression, as well as 82157476af
